

Kütai - possibly the optimum venue for on-snow testing, hosts the SIGB Snow Test in 2022. The Test is open to all UK retailers and media for equipment testing for the following winter. Registered testers can evaluate skis and boards and record their test results on the dedicated Test app or old-school score cards. There will also be some boots, accessories and clothing available to try where it matters - on snow, in the mountains.

What makes Kütai ideal?

- 30 mins from Innsbruck airport
- Snow-sure 2,000m altitude
- Test site next to reserved parking area
- Ski-in and ski-out with 4 easily accessible lifts
- Quick turn-around to maximise testing time
- Wide variety of terrain, including off-piste
- Park and Pipe close by
- Hotels within easy walking distance from test site

Registration - pdf forms attached but online registration will be available by mid-October (details to follow).

Accommodation - There are no special deals with the closest hotel, the Alpenrose, which has gone with dynamic pricing (www.hotel-alpenrose.eu/en/). There is a new hotel development at the Jagdschloss (www.jagdschloss-resort.at/en/), just over the road from the Test Centre (better prices than Alpenrose).

We suggest using Booking.com or similar sites to make a booking and to get the best possible cancellation policy terms.

Better priced accommodation options are down the valley towards Oetz and Sellrain but this will require 15-25 minutes driving.

Lift passes - discounted lift passes will be available to all registered attendees.
